

# Mining Together Toolkit

Maputo, CASM AGM, September 2009

Anne-Marie Fleury – ICMM  
Liz Wall – Shared Resources

# ICMM mandate and goals

- ICMM is a CEO-led industry group that addresses key priorities and emerging issues within the sector. It seeks to play a leading role by promoting good practice and improved performance internationally and across different commodities.
- Members:
  - 17 multinational companies
  - 30 industry associations

RioTinto

BARRICK

 **NIPPON MINING & METALS CO.,LTD.**

teckcominco

# ICMM's Sustainable Development Framework

**10 Principles for Sustainable Development which corporate members are required to implement throughout their businesses**

**A commitment to publicly reporting performance against the 10 Principles in line with the GRI G3 Sustainability Reporting Guidelines and Mining and Metals Sector Supplement**

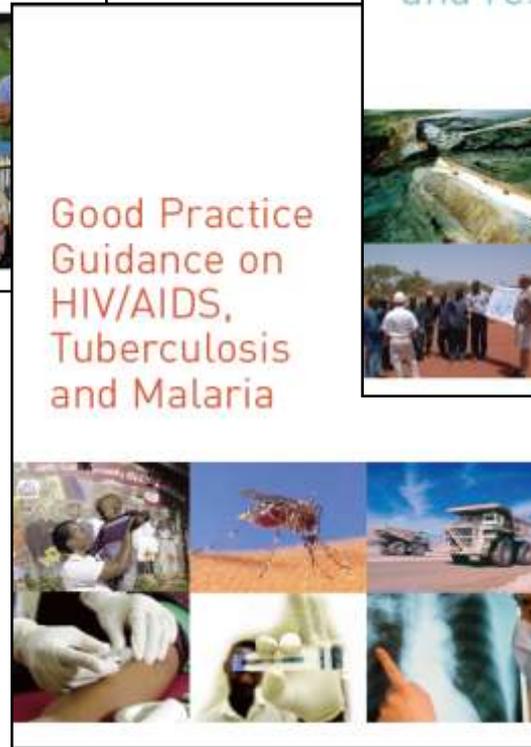

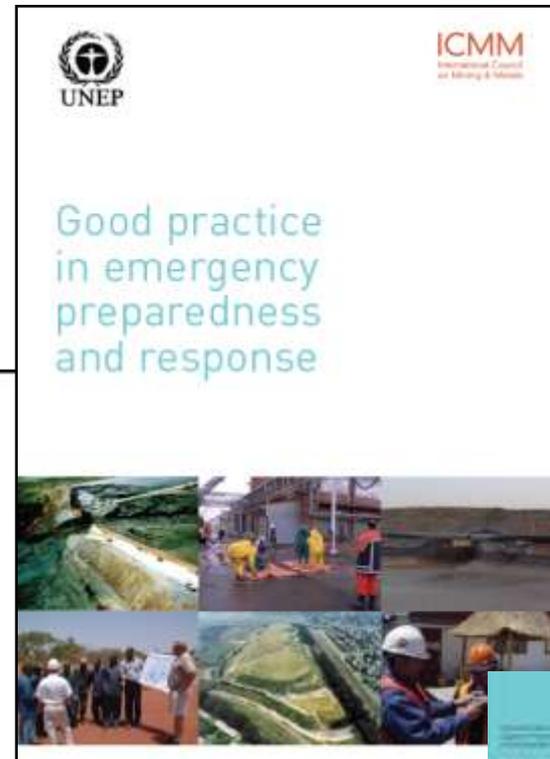

**Independent external assurance of members reported performance against the ICMM Principles and GRI requirements**

# ICMM Association Members

- Camara Minera de Mexico
- Chamber of Mines of South Africa
- Consejo Minero a.g.
- Eurometaux
- Euromines
- Federation of Indian Mineral Industries
- Indonesian Mining Association
- Instituto Brasileiro de Mineracao
- International Copper Association
- International Wrought Copper Council
- International Zinc Association
- Japan Mining Industry Association
- Lead Development Association International
- Minerals Council of Australia
- Mining Association of Canada
- Mining Industry Associations of Southern Africa
- Nickel Institute
- Prospectors and Developers Association of Canada
- Sociedad Nacional de Minería de Chile
- Sociedad Nacional de Minería Petróleo y Energía
- The Cobalt Development Institute
- World Coal Institute
- World Gold Council

# Priority issues

Good Practice  
Guidance for  
Mining and  
Biodiversity

# Artisanal & Small-Scale Mining

- ASM occurs near/on large-scale mining operations
- ASM is part of community engagement
- Need for collaborative approaches
- Development of Toolkit for LSM companies, in collaboration with CASM and CommDev

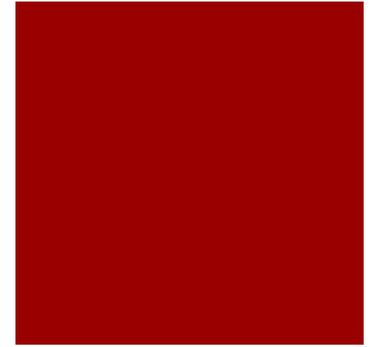

# The Toolkit – in short...

- Introduction to ASM-LSM interaction;
- Key issues facing ASM-LSM engagement;
- Business Case for companies to engage with ASM;
- Tools to assist companies to engage with ASM.

# Types of ASM

- Broad characterization of 5 types of ASM activity for toolkit simplicity:
  - Traditional ASM;
  - Seasonal ASM;
  - Permanent co-habitation ASM;
  - Shock ASM; and
  - Influx ASM
- Consideration of legal status

# 17 tools

- Diagnostic assessment;
- Stakeholder Engagement;
- Community Development;
- Resettlement;
- Alternative Livelihood Programmes;
- Regularisation/Formalisation;
- Organisation;
- Purchasing Programmes
- Employment of ASM workers;
- Workforce Awareness;
- Segregation of Concession;
- Security and Human Rights;
- Conflict Resolution;
- ASM Department;
- Technical assistance;
- Mine closure planning;
- Monitoring and evaluation

| <i>Tools</i>                             | <b>Traditional ASM</b> | <b>Seasonal ASM</b> | <b>Permanent Co-habitation</b> | <b>Shock ASM</b> | <b>Influx ASM</b> | <b>Illegal ASM</b> |
|--|------------------------|---------------------|--------------------------------|------------------|-------------------|--------------------|
| <i>ASM Baseline Survey</i>               |                        |                     |                                |                  |                   |                    |
| <i>Stakeholder Engagement</i>            |                        |                     |                                |                  |                   |                    |
| <i>Community Development Programmes</i>  |                        |                     |                                |                  |                   |                    |
| <i>Alternative Livelihood Programmes</i> |                        |                     |                                |                  |                   |                    |
| <i>Resettlement and Relocation</i>       |                        |                     |                                |                  |                   |                    |
| <i>Regularisation /Formalisation</i>     |                        |                     |                                |                  |                   |                    |
| <i>Organisation</i>                      |                        |                     |                                |                  |                   |                    |
| <i>Purchasing Programmes</i>             |                        |                     |                                |                  |                   |                    |
| <i>Employment of ASM Workers</i>         |                        |                     |                                |                  |                   |                    |
| <i>Contractor Inductions</i>             |                        |                     |                                |                  |                   |                    |
| <i>Segregation of Concession</i>         |                        |                     |                                |                  |                   |                    |
| <i>Conflict Resolution</i>               |                        |                     |                                |                  |                   |                    |
| <i>Adoption of Voluntary Principles</i>  |                        |                     |                                |                  |                   |                    |
| <i>ASM Dept on LSM minesite</i>          |                        |                     |                                |                  |                   |                    |
| <i>Technical Assistance programmes</i>   |                        |                     |                                |                  |                   |                    |
| <i>Closure Planning</i>                  |                        |                     |                                |                  |                   |                    |
| <i>Monitoring and Evaluation</i>         |                        |                     |                                |                  |                   |                    |

# 1. Diagnostic Assessment

- Objective:
  - To understand the type of ASM activity being undertaken, the economy it operates within, the people involved in the activity to inform the engagement approach companies may take with ASM stakeholders;
- Application:
  - All companies should use this tool

## 2. Stakeholder Engagement

- Objective:

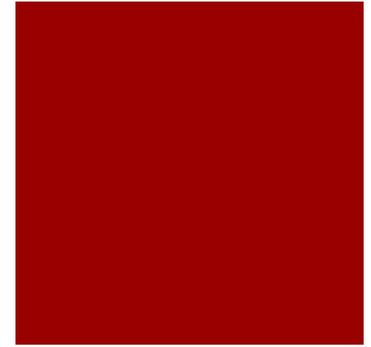

- Engagement between LSM and ASM stakeholders is essential to build cooperative and constructive relationships;

- Applications:

- All companies should be using this tool when operating in close proximity to ASM activities

# 3. Community Development – Participatory Approaches

- Objective:
  - LSM companies can target community development projects to support ASM miners;
  - It provides guidance on how an LSM company can go about working with ASM community members to identify the appropriate development projects in a participative manner, and develop a partnership to implement them.
  
- Application:
  - Most applicable for companies working with traditional, seasonal or more settled forms of ASM

# 4. Resettlement Planning

- Objective:
  - To help companies facing resettlement of ASM miners consider all the alternatives available to them, and to provide some guidance on how to carry out a successful resettlement programme;
  - The plan details actions that the company will take to mitigate adverse effects, compensate losses, and provide development benefits to persons and communities affected by a project.
- Application:
  - To be used by companies needing to resettle traditional, seasonal or settled miners

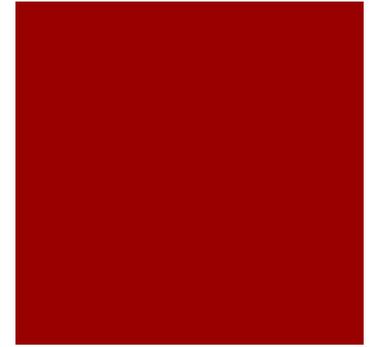

# 5. Alternative Livelihood Programmes

- Objective:
  - To identify and support opportunities for individuals and/or families to diversify their income and in some cases move away from specific livelihood activities;
  - Any alternative needs to be of similar value to individuals and families.
- Applications:
  - Alternative livelihood programmes more likely to be successful with non-traditional ASM communities

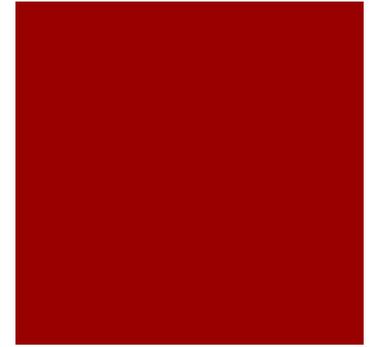

# 6.

## Regularisation/Formalisation

- Objective:
  - Legality of operations can prevent LSM companies working with ASM miners;
  - Assisting ASM miners to regularise their operations can pave the way for far greater engagement with the miners.
- Application:
  - To be used when companies are seeking to engage with ASM activities which are operating outside the legal framework

# 7. Organisation

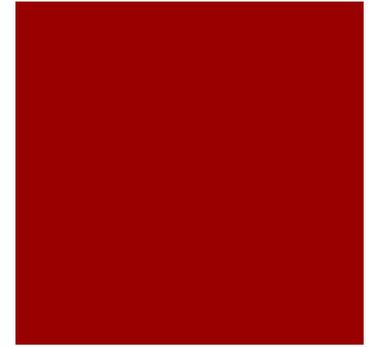

- Objective:
  - Access to basic services, including technical assistance, donor funding and micro-credit can be difficult for ASM miners operating individually;
  - Organisation into cooperatives or associations can increase access to these services.
- Application:
  - Depending on ASM miners needs, can be applied to working with all types of ASM

# 8. Purchasing Programmes

- Objective:
  - To support ASM miners through purchasing ore, providing both a more secure market, minimising logistical challenges, and in some cases improving the prices paid;
- Application:
  - Best determined through conducting a risk assessment;
  - Supporting ASM miners to gain fair trade certification may be more appropriate in some cases.

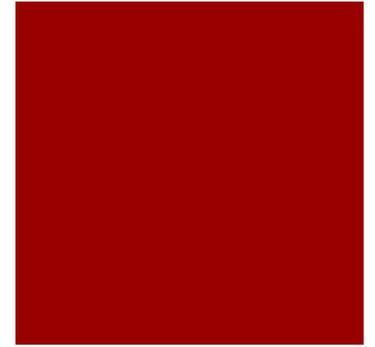

# 9. Employment in LSM Operations

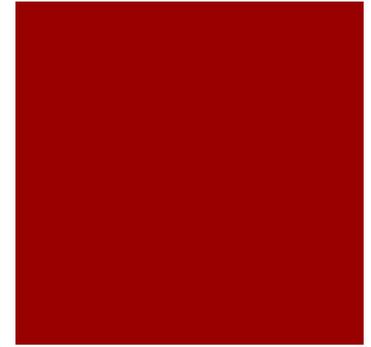

- Objective:
  - Probably the most common request from ASM miners to LSM companies is for employment;
  - The tool seeks to advise companies on how to manage these requests and distribute available work equitably.
  
- Application:
  - Different roles for ASM miners at different stages of LSM mineral cycle – exploration, construction, operation, closure etc

# 10. Workforce Awareness

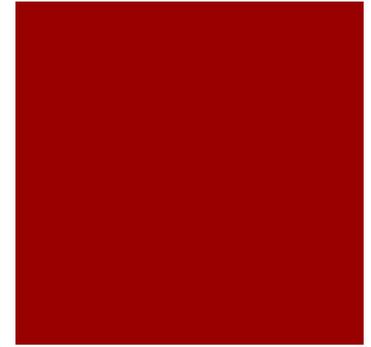

- Objective:
  - A company's approach to ASM needs to be articulated and adopted throughout the workforce;
  - Workforce inductions are required for Health, Safety and Environmental considerations – opportunities for inductions in ASM engagement.
  
- Application:
  - Can be used in all LSM operations engaging with ASM

# 11. Segregation of Mineral Concessions

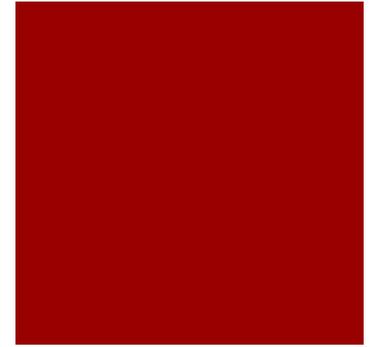

- Objective:
  - Segregation of LSM mineral concessions to invite ASM activity onto the concession in designated areas which can't be mined by LSM companies
- Application:
  - This really only applies when LSM and ASM are operating in very close proximity.

# 12. Managing Security to Respect Human Rights

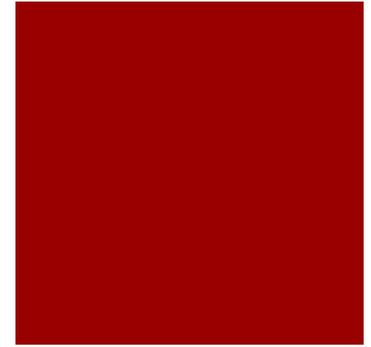

- Objective:
  - The tool seeks to minimise human rights challenges associated with interaction between ASM miners and security providers, either Government or private;
  - Primary focus is on the adoption of Voluntary Principles
- Application:
  - The adoption of Voluntary Principles is recommended for all extractive companies. The Principles should be applied from the commencement of LSM activity.

# 13. Conflict Resolution

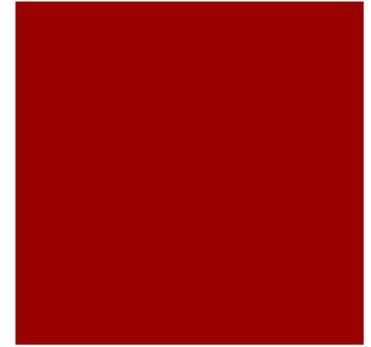

- Objective:
  - The relationships between large-scale mining, artisanal and small-scale mining, surrounding communities and security forces are not always peaceful;
  - This tool is designed to offer companies an approach to the resolution of conflict, without reliance upon either legal remedies or use of force.
  
- Application:
  - This tool can be applied unilaterally;
  - Important to involve Government in conflict resolution mechanisms, particularly with illegal ASM activities.

# 14. Establishment of an ASM Department

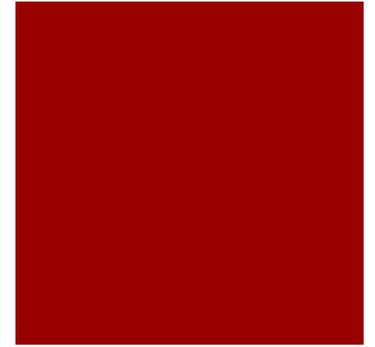

- Objective:
  - The establishment of a specific artisanal and small-scale mining department on a large-scale mining site can bring together the multiple disciplines that need to work together on ASM issues in a united fashion;
- Application:
  - Likely to be dependent on the scale of the engagement and interaction between LSM and ASM stakeholders

# 15. Technical Assistance Programmes

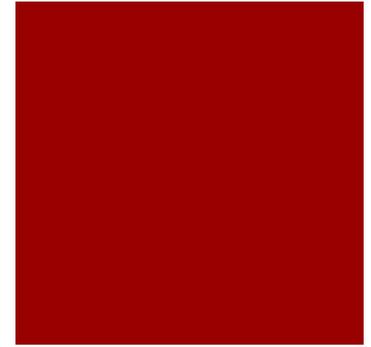

- Objective:
  - Technical assistance programmes cover a wide range of activities and support a LSM company or partner might extend to a group of ASM miners;
  - Programmes can include improvements in health, safety and environmental practices, improved mining and processing techniques, facilitation of access to processing plants or markets and many other activities.
  
- Application:
  - Technical assistance programmes can be used in almost all settings involving LSM and ASM working together

# 16. Mine Closure Planning

- Objective:
  - This tool is intended to identify a number of aspects of mine closure planning in which ASM miners can and should play a role
  
- Application:
  - ASM miners who will want to be involved in mine closure planning are likely to be more settled in the region.

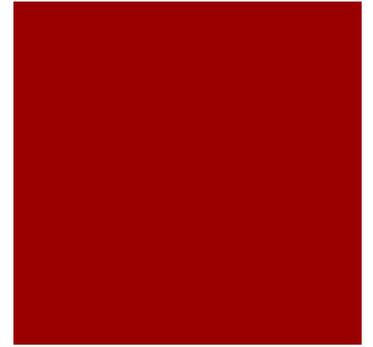

# 17. Monitoring and Evaluation

- Objective:
  - Assessing the success and implementation of projects undertaken by LSM companies working with ASM, considering:
    - What worked and why?
    - What did not work and why?
    - What could have been done differently?
    - What adjustments and changes are now required?
- Application:
  - Should be used by all companies in all projects

# Where to from here...

- Peer review process underway;
- Road testing launch next year;
- Toolkit to be “piloted” – with further reviews as needed;
- Translation.

# Questions...

- Which are the 3 most useful tools and why?
- Which tools (in your opinion) are least useful and why?
- Have we missed any key aspects of engagement between ASM and LSM? Are there any gaps/ which specific issues not addressed by the tools? And could this be addressed by adding tools?
